**January Member Meeting
CANCELLED**

January 2021

PRESIDENT'S MESSAGE

President's Message
by
Ed Brown

Greetings NFC Members,

Because of the Covid-19 virus the annual January 2021 NFC member meeting will be cancelled. We will have the NFC board meeting by Zoom on January 12, 2021. The vaccine is coming soon and we will hopefully begin to resume some of our normal social activities.

The red tide is here again and has had an effect on the fishing all around Naples and Marco Island. The only advice I can give you, is to go South until you do not have any buzzards flying above the area you want to fish. That is what has been working for me.

Fishing is still good south of Coon Key. We still have a strong spotted sea trout bite, but the only problem is finding legal fish. You will catch seven undersized

spotted sea trout to one legal spotted sea trout. You can catch as many as thirty to forty spotted sea trout in one fish outing. You can use the popping cork or the brown jig tipped with shrimp. The whiting bite is very strong as well; however, you have to find a deeper channel with some current. The whiting has a very light bite. You can use the brown jig tipped with fish bites and shrimp again. You have to jig the lure slowly across the bottom. Whiting is a very good eating fish.

Fred Dugach has created a new website for the Naples Fishing Club. The website is NaplesFishingClub.com. We will be using the website for upcoming events, current activities, posting the Hook and any pictures of our members catching fish. The new website will be a tool for us to attract new members to our club. Any member interested in helping to update our website, please send

an email to ebrown822@aol.com.

The winter slam tournament is still scheduled for January 28, 29 or 30, 2021. If you are interested in participating in this tournament, please contact Dave Huff – davhuff@grantsburgtelcom.net or 715-338-5850.

Good Luck Fishing.

Be Safe.

Ed

May the new year 2021 bring
peace, joy and good health to all.

Naples Fishing Club
Board of Directors

**NFC Member
Charter Boat Information**

NFC member, Bob Bixler, will be assisting members with offshore charter services. He will be able to book your trips if you have a full party for 6 or if you are looking to hop on a trip that only needs 1. He has the network to fill trips with anything in-between.

The primary boat is Off Her Radar operated by Captain Rob Trammel. Checkout their website for more information about the boat.

If you would like more information, contact Bob;

Charter.bix@gmail.com

989-859-7559

**OFF HER RADAR
Charter schedule available**

Wed	01-13-21	Spots open- 1
Wed	01-20-21	Spots open- 1
Mon	01-25-21	Spots open- 5
Wed	02-03-21	Spots open- 5
Tues	02-09-21	Spots open- 5
Wed	02-17-21	Spots open- 4
Wed	02-24-21	Spots open- 1

These trips will cost \$250-\$275 plus tip, leave from Bayview Boat Launch, 7AM.

Contact Bob Bixler;

**FISHING CONTEST
RULES**

Jan 1– Dec 31, 2021

1. Largest fish is defined as longest by fork or overall length with mouth closed, as determined by the Florida Fish and Wildlife Conservation Commission.
2. Eligible inshore fish are Snook, Trout, Pompano, Sheepshead, Blackdrum and Redfish. Offshore fish are Grouper and Kingfish. Eligible fish must be caught in the Gulf waters within Collier and Lee Counties.
3. Inshore is defined as no further than one mile from Gulf shoreline. Offshore is defined as one mile from the Gulf shore to anywhere in the Gulf of Mexico.
4. Awards schedule will run from January 1 to Dec 31.
5. An eligible fish must be verified to enter the NFC contest. Send a photo of the fish with a measuring device clearly indicating the length of the fish.
6. One award will be allowed per person. A person winning more than one shall pick which fish to receive the award for.
7. All submitted fish are subject to final review of the NFC Board
8. If two identical size fish are entered, the first entry will be the winning entry if it's the largest in the category.
9. All entries must be submitted within 30 days of date the fish was caught, except that no entries will be accepted after December 31st of the year of the contest.

All entries **MUST** be approved by **Robert Roesing/** Chair.

Please send your photos to

Robert:

BY
JOHN GOODING**

**Fish Bones Make Great
Meals!!!!!!**

While fishermen are cleaning and filleting fish, little regard is given to the fish bones being discarded so readily. Many of them may not be aware of how our quality of life is so greatly improved by the use of fish bones and how many other animals are kept in a healthy state by the ingenious use of fish bones. Medicines, meals, egg production and even a good quality soup benefit from the use of fish bones - just to mention a few. Let us explore the commercial use of fish bones.

The following information is taken from document # PS12, one of a series of the Animal Science Department, Florida Cooperative Extension Service, By Richard D. Miles, professor, Dairy and Poultry Sciences, and Jacqueline P. Jacob, poultry extension coordinator, Dairy and Poultry Sciences, Institute of Food and Agricultural Sciences, University of Florida, Gainesville, 32611.

Fishmeal: a valuable feed ingredient

'High quality fishmeal is recognized by animal nutritionists as an excellent source of protein, energy, minerals and vitamins. Worldwide, millions of tons of fishmeal are produced annually. The majority of the fishmeal produced is included in commercial diets for poultry, swine, dairy cattle, mink and fish.

What Types of Fish are Used?

Fishmeal can be made from almost any type of fish but is generally

manufactured from two main types. These two types of fish differ both in their ability to store oil as well as where in the body oil is stored. The first type includes a group referred to as "lean fish." This includes such species as cod and haddock. In these species the oil is stored primarily in the liver. The flesh (fillets) contain very little oil. Fishmeal from this type of fish has a low oil content (2 to 6%) since the livers are removed before processing. Of course, if the livers are added back, or the whole fish is used, the oil content would be higher. The whole fish is not usually used since cod and haddock are prized for their fillets. Since the fillets are used for human consumption, the fishmeal from these lean fish are made principally from the offal (white fish frames) remaining after filleting. "White" fishmeal commonly contains a higher concentration of ash (minerals) since the bony frames (head and racks) of previously filleted cod, haddocks, etc. are used. White fishmeal constitutes only 10% of the world fishmeal production. The second type of fish used to manufacture fishmeal stores oil in certain parts of the flesh. They are high oil fish and, unlike the lean fish, are not prized for their fillets. They are commonly referred to as "industrial fish." Such species as herring, menhaden, anchovy, pilchard, sardines and mackerel fall into this category. Approximately 90% of the world fishmeal production is from these high oil species.

How are the Fish Processed?

Fishmeal is made by cooking, pressing, drying and grinding the fish. When no oil needs to be removed, such as with lean fish, the pressing stage is often omitted. During cooking, the fish move through a long, steam-jacketed, screw conveyor cylinder. Cooking coagulates the proteins and is a critical process responsible for sterilizing the product and preparing it for liquor (a mixture of oil, water and protein) removal. Once cooked, the liquor is removed by pressing. The solid residue that remains after pressing is called "press cake." The liquor is centrifuged to remove the oil. This oil is often further refined

before being transported to storage tanks. Prior to storage, it is essential to add an antioxidant. The antioxidant will stabilize the oil so that oxygen will not cause damage during storage. The meals are then dried so that the moisture content is low enough to allow the meal to be stored and transported without mold or bacterial growth. Once the fishmeal is dried it has to be ground, screened to the correct particle size, packed in bags or stored in silos for bulk delivery to companies throughout the world.

What Type of Fishmeal is Commonly Produced in the U.S.A.?

In the U.S.A., the majority of the fishing industry is in the Gulf of Mexico and the Atlantic Ocean. The main industrial fish harvested is menhaden. In fact, 98% of the fish oil produced in the U.S.A. is from menhaden, a high oil species.'

Comment:

Here's what you need to make bone soup:

- *A pot full of any kind of fish bones will do -(you can use or mix any other kind of bone).*
- *Add your favorite vegetables and potatoes. – as you would your favorite pot of soup but make sure it's packed full of bones.*
- *Add your favorite herbs and spices.*
- *The magical ingredient is **VINEGAR!** You must add some vinegar to the pot of soup in order to force the calcium in the bones to dissolve from the bones into the soup juice. **Just 1 pint of soup can give you as much as 1,000 milligrams of calcium.***

Now let the bones stew for 4 hours or even longer.

Make sure all the meat has either fell off the bones or just starting to fall off the bone before you serve. Bones add tons of flavor to all recipes!

ENJOY!!!!!!

**COME AND "SET THE HOOK
WITH THE REST OF THE
MEMBERS"**

INSHORE & OFFSHORE

BY

DON RENCH

With holiday temperatures reaching lows that haven't been seen in 10 years, the trout action is thick and consistent. We are getting reports of the presence of the red tide affecting South Florida again. Keep an eye out for the updated reports from FWC. With the falling water temperature look for the usual species. Incoming tides working ledges with cut bait or tipped jigs should produce redfish and trout. Look for Snook around docks early and late in the day. Use high water to explore. Whole shrimp with a popper and a light leader if you can't find live bait. The beaches have been holding nice schools of good-sized pilchards. Pompano action has been good with keeper fish being plentiful. The offshore group will need to be flexible and have a plan to work various spots both near and offshore due to the sporadic high wind patterns with the many passing fronts. Look for areas where there are birds working and maybe a little deeper water where the bait schools are breaking the surface. The spots should either be very near shore or going out past 20 miles to pick up clean water. The established near shore reefs are holding keeper snapper and sea trout. Deep on the wrecks and reefs look for kingfish and cobia and maybe even a grouper or two. Very large Cobia have still been caught and can make for a great

trip. Please stay safe, healthy and by all means wet a line when you can.

Don

Chris Peruski and wife visited their son and fiance in Ft Walton Beach/Destin for Thanksgiving. The rented a boat to see if they could figure out how to catch American Red Snapper during the last weekend of the Florida extended season. They caught their limit of red snapper by noon, fishing about 3 miles off shore in about 65ft of water. They also caught vermilion snapper, porgy, trigger fish, amberjacks and bonita. The fishing was awesome and a bit different up there than here in SWFL.

**2021
NFC 3 Man Winter Slam
January 28, 29 & 30**

When ----- January 28, 29 & 30
Fishing Hours: We will be using Flex Time. Captain's choice of either day. Fish any 6 continuous hours between the hours 7:00AM 5:00PM.

Entry fee: \$10.00 for members.
 \$15.00 for non-members.

All fees will be distributed to the winning teams.

How it works: Send entry fee to Kat @ the NFC address. A list will be forwarded to Dave Huff. Members with boats will be paired up with members without boats. The catch results will be turned in by noon on Sunday January 31th Email Dave at davhuff@grantsburgtelcom.net

OR text your pictures to 715.338.5850.

Rules: Total inches from 1 of each species. Snook, Trout and Redfish to be measured on a "L" Shape or Bump ruler to the nearest 1/4 of an inch and determine the winning team. "CLEAR" Photo of your catch showing the length is required. Maximum of 3 anglers per boat. No licensed Captains are allowed to participate. Boundaries will be as follows: From South of Big Carlos Pass channel for Estero Bay across to Coconut Rd. down to the North side of Everglades National Park by Camp Lulu. Maximum 1 mile off of the Gulf Shoreline.

Prizes are as follows: 1st - \$100.00, 2nd- \$75.00 and 3rd- \$50.00.

Mystery Fish Biggest Jack Prize ?
 Winners will also be posted in the February Hook.

Questions? Contact Dave @ 715.338.5850

Schafer's Schtuff
by
Jim Schafer

COPING with COVID

I really wasn't going to write anything about the Covid virus so I won't. There's too much "opinion" that's passed as fact out there already. What I will write about is how I am passing the pandemic panic hours.

What I decided to do is to learn how to do computer slide shows. My underlying purpose was to show them at the Naples Fishing Club meetings and send them to the LunkerBusters club in Illinois that I helped start before I moved. Another venue would be my community in Naples and my newer home near St. Louis, and others.

I had an outline of what to do and not do from past club presentations.

#1) Don't make them too long. The average is 12 slides and 10-15 minutes of narration. Meetings are in the evening after dinner which is traditionally pre-bed/ nap time. The eyes get heavy and the heads are a bobbin. Keep them shows short and snappy.

#2) Don't get too bogged down with facts and charts with numbers and mumbo-jumbo, etc.

#3) Keep it light and bright. Slides that represent cliches and old

sayings that don't make people think too much, along with some personal and web pictures.

When I started, I had a few thoughts about subject matter, but everyone has their favorites. I hope I covered some of yours. Remember, I am not quitting until this virus thing is over. I now have 32 slide presentations that run the gamut of fishing subjects and some semi-related to fishing in some way. Funny thing though, the more presentations I do, the more I think of others I want to do.

It's a little conceited of me to think I have the answers people are looking for, but they've done alright for me and it's my way to pay it forward.

Reality strikes us aged fishermen the worst. You've got all this knowledge and experience to hand out and no one is getting in line to receive it.

I always tell people fishing articles are just opinion pieces, or ego inflators) because we can't ask the fish if they're true even if we wanted to. The next best thing to teaching somebody is to put my remembrances into these slide shows before I forget them. We all have great memories from a lifetime of that great sport we call fishing. I encourage you to write yours down.

You may find an unused kernel of knowledge anywhere throughout these shows if you look and listen. Or Not!

I'm hoping that fishing clubs will use them as a filler to their regularly scheduled programming. COMING TO A FISHING CLUB MEETING NEAR YOU SOON! I HOPE!!

FOR SALE ITEMS

The HOOK welcomes listing any fishing or boating items members have for sale. Contact NFC Secretary, Kat McNabb, katmmc@aol.com

NOTICE

As set forth in NFC's Rules and Regulations, a guest may register as a prospective member, attend one meeting and receive the current newsletter. If the guest has not joined the NFC by the publication of the following newsletter, their name will be deleted. If you have any questions, please contact Kat-239 595 3122

Iconic "Old Florida" store closes

The area won't be the same without Del's 24 hour store. The 24/7 that never closes- bait and beer purveyor has closed it's doors after more than 55 years. Del passed away on August 15, 2019. Almost exactly one year later, Del's store closed. I once stopped in at 8am on Christmas day and bought a newspaper. The front door had neither lock nor key area. It will be missed. I will use Mike's bait on Thomasson and Bayview as a substitute. As a bonus they have smoked Mullet. mmm breakfast!

Jim Schafer

FISHING BUDDY SYSTEM

A service the Club offers is the "Fishing Buddies Program". If you have a boat or are boat-less, and need a buddy, register for the program at the sign in table at a member meeting. When fishing on someone's boat, there are a few things to remember; first this is not a charter. The boat owner will not bait your hook, etc. We find people generally share in the cost of the trip. Sometimes your share may be \$30, other times more. Always know what your share will be before you go fishing. Finally, check out the safety equipment before leaving shore.

Members must make all of their own arrangements. The Club's only function is to offer the program and maintain a list. Participation is optional.

MEMBERSHIP TYPES	Membership Application	NAPLES FISHING CLUB OFFICERS
-------------------------	-------------------------------	-------------------------------------

There are four types of membership in the NFC.

Individual: Member is entitled to attend meetings, receive the monthly newsletter- the HOOK, participate in special outings and travel offers, and participate in the NFC ‘fishing buddies’ programs.

Dues- \$75.00

Family: A husband and/or wife plus children receive all the benefits described for an individual member.

Dues- \$100

Junior: Open to anyone under 16 years of age. Junioe members have all the privileges of an Individual member plus they may attend most your programs free.

Dues- \$10

Business Membership: A business may place a business card ad in the HOOK and announce special promotions. The business’ website will be linked to the NFC’s website and will be allowed to display product at a meeting.

Donation: \$200

MEETING LOCATION

Club meetings are held at the VFW Post 7721, 800 Neff’s Way, the **THIRD TUESDAY** of the month. VFW is located just before the Pine Ridge and Collier Blvd intersection behind the small strip mall on the NW intersection corner. VFW’s phone #: 239 455 7721
